An ISIS propaganda website on the dark web has been hacked and replaced with an advert for a service selling prozac and viagra tablets which told extremists to 'calm down.'

The site for the terror group appeared on the Tor browser of the dark web last week in a bid to get extremists to join up.

However, less than a week later, the site had been hacked and visitors to the page were greeted with a message for the medication.

It read: 'Too much ISIS. Enhance your calm. Too many people are into this ISIS-stuff. Please gaze upon this lovely ad so we can upgrade our infrastructure to give you ISIS content you all so desperately crave.'

According to the IBT, the website was taken down by Ghost Security Group, an independent counter-terrorism network.

It is believed to be the first time that a hacking group have taken down a website on the dark web.

Before:

After:

Too Much ISIS

Enhance your calm. Too many people are into this ISIS-stuff. Please gaze upon this lovely ad so we can upgrade our infrastructure to give you ISIS content you all so desperately crave.

An advertisement banner for CoinRx.com. On the left, it says 'CoinRx.com Online Pharmacy'. In the center, it states 'We accept Litecoin, Bitcoin & Dogecoin' and 'No prescription required'. On the right, there is a blue arrow pointing right with the text 'FIND YOUR RX NOW' and a small play button icon.
