[DONE] Downtime this weekend!

Written by bad_brain
Tuesday, 26 October 2010 22:38 - Last Updated Saturday, 30 October 2010 09:37

This weekend suck-o will be offline for 8-9 hours because the server is moved to a new datacenter by the provider.

The downtime is expected from Friday 29. 10:30pm to Saturday 30. 7:00am*, IRC will be offline for some hours more because I have to start it (ircd and services) manually after the server rebooted...and I will surely not be awake at 7:00am on a Saturday...^^

This is the new datacenter btw: https://www.datadock.eu/en/

And don't worry, even if the server falls off the truck I always have full backups...^^
